**Next HNA Membership Meeting:

7:00 pm
Sage Campus Center, Room 214**

**Topic: Review of Plans for the New Scotland
Branch of the Albany Public Library
And
Nominations for the 2008
HNA Board of Directors**

DEAR NEIGHBORS:

All Hallows has come and gone, the leaves are filling our yards, and the days are getting shorter, but there is still a lot of activity in our neighborhood. New businesses are getting ready to open, the rehabilitation of School 19 is underway, and the public input process into the new branch library is in full swing. I encourage all of you to attend as many of the public meetings on the new branch as you possibly can and make yourselves heard. Representatives of the Library will be at our November meeting for just that purpose.

As some of you know, I have decided not to seek another term as HNA Chair. This is not because I intend to stop coming to meetings or help with neighborhood projects. It is simply because I have some new challenges and adventures to pursue in both my professional career and in married life (all good thankfully!). I believe that something as important as HNA deserves nothing less than a chairperson who can devote the time and attention needed to protect what we have developed and guide our Association into the future. Therefore I decided to end my tenure with this term. I am confident that the Association will be in very capable hands.

As our final meeting of the year is the day before Thanksgiving, I thought I would share a few of the things that I am thankful for:

- I am thankful for the efforts of my fellow board members, through their tireless dedication, to making our neighborhood the best in the city.
- I am thankful for having had the opportunity these past few years to lead a neighborhood association that has been so successful in developing relationships among neighbors, promoting responsible economic development, and overall quality of life for more than four thousand men, women, and children.
- But most of all, I am thankful to all of you, for the trust you have placed in me during this time, for sharing your advice, your humor, and your humanity.

If you are unable to attend the November meeting due to planned holiday travels or preparations, I extend to one and all my best wishes for a wonderful and (hopefully not too snowy) holiday season! See you at the meeting!

After many years of delivering the HNA Reporter to his neighbors on Hollywood Avenue, Nacr Hechihoncki has decided to "retire" from this position. The Newsletter Committee is grateful for his dedication to HNA and hopes to find someone to fill his shoes. If you enjoy reading the HNA Reporter, and can spare 1 hour every other month to make deliveries, call 482-2775 to volunteer. Thanks!

New AMCH Parking Garage and VAMC Administrative Offices Planned

Albany Medical Center (AMCH) plans to build a 7-story parking garage with a capacity for 1,500 to 2,000 cars on 3 acres of the Stratton VA Medical Center's (VAMC) property. In addition, AMCH would tear down two outdated VAMC administrative buildings and a storage building and replace them with a 19,000 sq. ft. building, to be used as VAMC administrative offices. The garage would provide needed additional parking for AMCH and updated office facilities for the VAMC.

The cost of the project is estimated to be in the range of \$4 million for the office buildings and \$25 and \$35 million for the garage. The design phase will take one year with an additional one to two years for construction for completion in 2010 or 2011. Though the project is on federally owned property, it must conform to local building and zoning laws. (Authorization for the project is through the federal Enhanced Use Lease Program and falls under Title 38 USC, Sections 8161-8169 of the National Environmental Protection Act.)

A public hearing was held at the VAMC on September 24. New Scotland Avenue area residents were not notified of the hearing except through an article in the September 21 Times Union. Despite the low attendance, questions were raised by residents

regarding the need for the parking facility and the concern that there doesn't seem to be a plan to improve the quality and increase the use of public transportation, both for employees and individuals receiving medical services. Another issue concerned how the streetscape will look with two parking garages side by side. One suggestion favored creating a mixed-use facility with retail on the street level similar to the nearby Hilton Hotel.

Officials from both medical centers said residents' concerns would be

Being "Green" at Home and in Our Community

These days being, thinking and living *green* or *sustainable* is the new trend. In the last month, I have received four magazines ranging from architecture and residential design to parenting to health that all have feature articles on "going green." This is indeed a good thing. Everyone's individual efforts towards reducing their "carbon footprints" will in effect reduce the strain we collectively put on the environment. More importantly, this will reduce the burden of our children's and grandchildren's generation in preserving the environment and precious natural resources we have taken for granted. What are some ways in which we can each do our part?

- Change your method of getting to work: consider options like work from home, walk or bike (clean air modes of transportation), drive a hybrid or better yet carpool in a hybrid, or make use of public transit (buses will be on the road using fuel whether or not they are filled with passengers).
- Consider where your food and other products come from: join a food co-operative that encourages and supports local suppliers, support local farmers markets, participate in a CSA program (community supported agriculture), or at last resort make a conscientious effort while grocery shopping to purchase products that have traveled the shortest distance to get to your home.
- Reduce unnecessary energy usage in your home by making sure things like cell-phone chargers and coffee makers are unplugged, computers and other electronics are turned off by means of a power strip and the use of high-efficiency appliances.

We are fortunate that our early 20th century neighborhood has all the options of being green and supporting a sustainable philosophy. We live in a walkable neighborhood with easily accessible public transit and local businesses. Our homes were built at a time when quality craftsmanship and long-lasting materials were the norm. In fact, it is widely acknowledged that "*the greenest building is the one that already exists*" since the act of constructing a new building today typically consumes 15-30 times the building's annual energy use. Demolition or "extreme makeovers" account for 25-40% of the nation's landfills, so the approach of preserve, repair or recycle is the greenest approach to building projects.

November 15th marks the annual "America Recycles Day" and this year Albany got into the act with the first annual Eco Show at the Empire State Plaza on November 12 and 13. This event offered educational seminars for adults and school groups. Watch for this show next year for more ideas on how to "go green."
